### **To access and run the online modules:**

- **Modules may be accessed through various browsers, such as Internet Explorer, Netscape, Mozilla Firefox, and Safari (Apple MAC).**
- Via a browser, go to [www.SoftwareForNurses.com](http://www.SoftwareForNurses.com)
- **New (first-time) Users:** select “**Enroll Now**”, then enter your organization’s Institution code, your personal Email address, your personal password, your name, your ID number (optional, if required by your organization), and a Security Code (optional, if required by your organization). To login when finished, click Continue, then “Log In”. Enter the same Email address and password you used when you enrolled, and your organization’s Institution Code: **S5740**. *Multiple enrollments (of one person) using different email addresses should be avoided!* **NOTE: Error code XL999 ..... an on-site administrator should be contacted if this error code appears (user limit exceeded).**

- **Returning (already-enrolled) Users:** select “**Log In**”. Enter the same Email address and password you used when you enrolled, and your organization’s Institution Code. *Multiple enrollments (of one person) using different email addresses should be avoided!* As needed, password can be retrieved from the User Login page (provided you are registered with a valid Email address). ***On-site administrators should be contacted for User Support regarding Email addresses, passwords, and current enrollment status.***
- After Login, click on a module title to get to the module and view a description of the module. **To launch a module, click on the module title above the description.**
- **NOTE: All enrollments, logins, and module access and scores are reported in Administrator Reports, and accessible to on-site educators/administrators and Professional Development Software. Unauthorized sharing of an Institution code with anyone outside the organization licensing modules from Professional Development Software is a violation of the organization's license agreement with Professional Development Software.**
