	BIO 121,122	8	BIO 11,12	5,5	
	MAT 120	4	MAT 5	4	

THE MAJOR:

Food science deals with the application of biological, physical, and social sciences in solving world food and nutritional problems. A study of food production from raw food sources allows a student to prepare for professional vocations such as directing food quality, researching and developing new foods, managing food processing inspection, working in test kitchens, or serving as a medical dietitian. Nutritionists work in health-related services in the community, state, or nation and as consultants for private pharmaceutical or food industries. The food scientist deals more with the research, quality control, and inspection of products in the food industry.

CAREER FIELDS:

Dietician	Professor	Researcher
Food Chemist	Public Health Officer	Teacher
Food Systems Management	Quality Control Officer	
Food Technologist	Test Kitchen Specialist
