THE MAJOR:

Geography is the science of spatial analysis concerned primarily with interpreting the occurrence, distribution, and interrelationships of the physical and cultural patterns which can be discerned. Employment is available in many areas of private business and industry, government agencies, and education as cartographers, geographic analysts, land officers, climatologists, intelligence specialists, economists, and teachers. Excellent employment opportunities exist in city and region planning, industrial location research, and teaching on several levels.

CAREER FIELDS:

Cartographer
Climatologist
Demographer
Industrial Location Geographer
Map Curator
Park Ranger
Teacher
Urban Regional Planner
