THE MAJOR:

The Human Development major is designed to provide students with a fundamental interdisciplinary understanding of human growth and development throughout the life cycle. The program of study concentrates on the psychological, sociocultural and biological dimensions of human development and on the underlying processes and structures which support that development. In addition a variety of experiences in community agencies and/or educational settings enables students to integrate knowledge with career goals in a variety of human service fields. The curriculum is flexible and designed to help students meet a variety of educational needs through a wide selection of courses appropriate to individual interests and goals. The program will be of interest to students who wish to enter a variety of professions that call for child development specialists.

CAREER FIELDS:

Day Care Center worker Elementary School teacher Preschool teacher
 Kindergarten teacher Nursery School Director
