

# *CCRAA Project Success*

Project Success focuses on student learning and success in Science, Technology, Engineering and Math (STEM) fields of study.

✚ Project Success will address the diversity of MVC students, their academic preparation and success in STEM and their learning through institutional change in STEM.

## ✚ Activities

- Increase the number of Hispanic and other low income students learning and success in STEM fields of study
  - Develop comprehensive STEM Student Success Center (SSSC)
- Develop model transfer STEM articulation agreements among MVC and four-year universities
  - Including STEM faculty & curricula development

## ✚ Goals

- Increase student persistence and graduation rates of targeted students in STEM fields of study
- Increase the transfer rate of targeted students in STEM fields of study
- Improve and increase STEM articulation agreements among institution and four-year universities
- Increase student learning and success through revised and integrated academic and student support service
- Increase the number of targeted students who pursue careers in STEM fields
