- Ensures units are examining their services and programs
- Documents outcomes assessment and internal improvement efforts
- Allows each unit to demonstrate how well it is performing
- Allows for requesting resources
- Relies on fact, not perception
- Allows unit staff to prioritize improvements.

### **Steps to Developing Assessment Plans & Reports**

1. **Unit develops measurable Service Area Outcomes (SAO).** An SAO is a “specific statement that describes the benefit that a [unit] hopes to achieve or the impact [. . .] that is a result of the work that your unit performs. Outcomes should be:
  - challenging but attainable”
  - articulate what the unit wants to achieve
  - indicate end results for the unit rather than actions
  - relate to the unit’s mission and vision
  - focus on the benefit to the recipient of the service
  - be stable over a number of years. If it is time dependent, it is most likely a goal not an outcome; and
  - be measurable and directly related to the work of your unit.

Stems for writing outcomes can include:

- “In support of student learning, staff will \_\_\_\_\_”
- “Students are aware of \_\_\_\_\_”

“Administrators (or staff) have the \_\_\_\_\_”

- 2. Unit defines how it will assess progress (non-evaluative) towards the outcomes.** The unit might consider taking an inventory of current tools being used. For example:
- what information is being collected already?
  - what assessment are you already using?

Methods that can be used to measure progress include, for example:

- student satisfaction surveys
- number and type of complaints
- growth in a specific function
- comparisons to professional organizations' best practices
- focus groups
- opinion surveys
- time to complete a task

- 3. Unit completes the assessment plan and carries out the assessment.** In order to ensure the plan is completed
- designate a coordinator for the assessment project and/or assign responsibility for individual components
  - develop a timeline indicating when work will be collected, results tabulated, analysis completed, and subsequent dialogues.

**Unit gathers information, analyzes results, communicates findings, and takes action.** This step is important as it is used to identify changes needed to improve efficiency, effectiveness, and unit performance. It should also be applied to for planning and budgeting and resource allocation requests (short term and long term). Ultimately it may be tied to the institution's ability to achieve its mission.
