

President's Update - May 21, 2013
2 p.m.

Today we received the written Forensic Analytical Consulting Services IEQ report, which is accessible from the link below. We have not had an opportunity to review the report, but wanted to post for your information. We expect to receive the written report from p2s soon regarding the HVAC system, which also will be posted. Once we have a chance to review both reports in full, we will post a proposed plan of action to resolve identified issues.
