

Click the link below for the complete, final report on the p2s Analysis of the HVAC system in the MTSC building. Charlie Wyckoff and Scott Zwart are meeting with James Del Monaco from p2s tomorrow (5/24) to review the report and get clarification on some of the more technical aspects of it. The next step will be to determine what adjustments and corrections need to be made, how much they will cost and the best way to accomplish them.
