PLT reviewed the following information topic:

Strategic Planning Prioritization of Initiatives
- This PLT meeting was dedicated solely to the extensive discussions surrounding the prioritization of initiatives. Each initiative, and the individual items within, was discussed in order to maximize College benefits.

The following measures were considered in the funding outcomes of the initiatives:
1. Alignment with College goals and mission.
2. College-wide data, as well as external initiatives and state and federal regulations.
3. Available funding streams including one-time funds, salary savings, capital outlay, categorical/grant allocations, indirect costs, instructional equipment and available facilities funds.

Dr. Anderson will make his final decision and send out his response to the joint council recommendations on prioritization by the end of January.
