Riverside City College

California Community Colleges are now offering Associate Degrees for Transfer (ADT's) to the CSU. These may include Associate in Arts (AA-T) or Associate in Science (AS-T) degrees. These degrees are designed to provide a clear pathway to a CSU major and baccalaureate degree. California Community College students who are awarded an AA-T or AS-T degree are guaranteed admission with junior standing somewhere in the CSU system and given priority admission consideration to their local CSU campus or to a program that is deemed similar to their community college major. This priority does not guarantee admission to specific majors or campuses. Students who have been awarded an AA-T or AS-T are able to complete their remaining requirements for the 120-unit baccalaureate degree within 60 semester or 90 quarter units. To view the most current list of Riverside City College Associate Degrees for Transfer and to find out which CSU campuses accept each degree, please go to: <u>www.calstate.edu/transfer/adt-search/search.shtml</u>. Students are encouraged to meet with a Riverside City College counselor to review their options for transfer and to develop an educational plan that best meets their goals and needs.

2023-2024 GEOGRAPHY (CSUGE) AA758 (IGETC) AA759

Associate in Art Geography for Transfer Degree

The Associate in Arts in Geography for Transfer degree is a curriculum pattern designed specifically to transfer student as Geography majors with junior status to the CSU system. Though the Association in Arts in Geography for Transfer degree also provides broad general preparation for Geography majors entering any four-year university, students must consult the specific requirements of any non-CSU campus to which they are applying. Students earning the Associate in Arts in Geography for Transfer degree will be provided with a deep appreciation of how the physical Earth Works. This degree will assist students in seamlessly transferring to a CSU.

Program Learning Outcomes

Upon successful completion of this program, student should be able to:

- Identify fundamental concepts specific to physical and cultural geography.
- Identify conceptual and theoretical models pertaining to world, regional, and local geography.
- Apply applications associated with various thematic maps.
